Where Friendship — Desire to serve — Good Will toward every one abounds.

Give fools their gold and knaves their power;

Let fortune's bubbles rise and fall;

Who sows a field or trains a flower,

Or plants a tree, is more than all.

—John Greenleaf Whittier.

Our thanks go out to you good people in appreciation of your continued patronage. Your very fine letters are truly a source of much satisfaction and again we regret our inability to make a personal reply in each instance.

Perhaps it should be mentioned here that we do not issue a **Fall List** and with stocks of so many varieties to check, it is impossible to get our new Spring Catalog in the mail until **Late January** each and every year.

GENERAL PREPAID LIST — PLEASE READ CAREFULLY

In many instances we do not list at the ten rate and to take care of the quantity buyer, you may deduct 20% discount on all orders of \$10.00 or over. 25% deposit will hold your bulbs until spring, but would suggest that you do not delay ordering until we could be sold out on many items.

It is gratifying to know we are not outdone by other growers in the inclusion of "top" extras that go with all orders.

Please remember discount and on items priced per 10, you may have 3 or more bulbs at the 10 rate, providing the aggregate of such items is not less than 20c.

SAINTPAULIA PRICE LIST

We hoped to mail this price list by April 1 but on that date we had too few varieties. The larger wholesale growers do not ship in winter, no one does, and because of the great demand it is very difficult to acquire stock of the newer sorts. The demand seems to exceed the possibilities of production. But now we have a sufficient number of varieties and a sufficiently large stock. We will add to these as rapidly as possible and later in the season, supplementary lists will be sent to those who purchase from this, but they will not be sent to our entire Saintpaulia mailing list nor will we keep on this list any who do not make a purchase this year.

Please do not inquire if we have certain varieties not listed. When we do, our active customers will be informed. Don't ask if we have a yellow Saintpaulia. We do not. No one has, nor will there ever be a yellow.

How To Grow Saintpaulias. Saintpaulias came only a little over 50 years ago from the Usambara district of Tanganyika, equatorial east Africa. Tanganyika includes Lake Victoria, source of the Nile in the north on the equator and extends about 12° south. It is entirely in the tropical zone. It is always summer. There is little variation in this climate except such as may result from changes in prevailing winds, if any.

The mean average temperature at low elevations is 80° and it is certainly a "mean" temperature for the white races. At higher elevations it may be about 10° cooler. Due to the proximity of the Indian ocean the humidity is quite high.

Saintpaulias are shade loving plants and cannot endure full sun. There should be as little variation in day and night temperatures as possible with about 12° as ideal. The best temperature is 70°. 80° in the day time does not stop flowering but somewhere in the 90°s, if very long continued, flowering may stop. 65° slows down growth and flowers and under 60° stops both. Plants are not killed at 40° but they are injured and that is the lowest temperature they can recover from. For that reason they cannot be shipped in winter.

It is evident that the temperatures in which Saintpaulias are comfortable and happy are the same as those humans require when lightly dressed. They are therefore ideal house plants because they can live with us. But they can't put on long red flannel underwear and be comfortable in cold houses in winter as we can, hence it is not uncommon for them to cease flowering in winter. The remedy is obvious.

Soil for most shade plants should be of mildly acid reaction. Saintpaulias are grown successfully in a wide variety of soils but no doubt the best is a very porous soil, rich in humus and containing enough sand to permit water to drain freely. They must be watered carefully as if water touches the foliage and plants soon after receives strong light the foliage becomes spotted. Likewise the water must be warmed to about the same temperature as surrounding air. The best and safest time to water is very early in the morning. Do not keep them soggy. Let them become slightly dry on soil surface before each watering. A good method is to set pots in tepid water and remove when soil surface becomes moist. The beauty of Saintpaulias depends on the foliage quite as much as on the flowers. Be sure to keep foliage in proper condition.

This short article cannot tell you all about Saintpaulias and their culture. You should send us \$2.75 for Miss Wilson's book, "African Violets, Saintpaulias". This is the first and only book on the subject. Like all house plants, Saintpaulias may be attacked by mealy bug or other insect enemies. The control of insect pests, de-

scriptions of all types and varieties, fertilizers, methods of propagation by leaf cuttings and division, crossing and breeding new sorts, growing seedlings, all phases of growing in the house or greenhouse is too large a subject for full treatment here. If you do not have Miss Wilson's book send for it with your first order, today and we will return it at once. Plant orders will be filled in rotation.

For the commercial production of Saintpaulias we are using an all concrete, aluminum and glass structure with heating plant automatically turned off by thermostat at 70°. In a similar manner an air conditioning unit begins automatically to cool the house at 80°. We hope to be able to furnish you flowering plants all summer.

But don't specify "flowering". We will always have a few new or recently acquired plants that will not yet be in flower.

Please order at once if possible. Cool weather is more favorable for shipping.

Guarantee. We will send out only good plants. They will be properly packed but we cannot guarantee that not a single leaf will be broken off as the leaf petioles are naturally brittle. With our present experience we seldom have a report of the slightest damage, but we cannot replace plants received in a growing condition. Beyond the occasional loss of a few broken leaves which can be used for propagation, they will usually arrive in perfect condition.

Packages are light in weight hence charges are small. Express is always safest, but costs more so we only ship that way at your expense. In early winter and early spring plants can be shipped safely by express, although too cold to mail.
